transportation urban sprawl is caused in part by the need to accommodate a rising urban population. Urban sprawl is characterized by low-density residential housing, single-use zoning, and increased reliance on the private automobile. The physical expansion of cities and towns, often referred to as sprawl, has significant environmental impacts. Plans aim to encourage alternative practice inspired by the work of innovative architects and planners. The impact of compact development on driving and sustainability is examined. The latest principles of urban design highlight how they can be applied to encourage sustainable communities. 

Bill text AB 1668 Water Management Planning - The bill would require the Department of Water Resources and other agencies to prepare and adopt comprehensive plans for protecting and managing water resources. This includes developing contingency plans to address the planning needs of small water suppliers and rural communities. The planning board's recommendations and guidance for the development and implementation of countywide drought and water shortage contingency plans are included. 

A revised 20-year strategy for the Sydenham to Bankstown urban renewal corridor discusses neighborhood character and heritage, while protecting neighborhood character and resilience. The plan examines the impact of compact development on driving and considers interdependence of various aspects of the environment.
